# EXOHOOD

---

Exo: Ancient Greek words, 'exo', meaning external and 'planete', meaning wanderer.

Hood: Hood is a reference to "Robin Hood" is a legendary heroic outlaw originally depicted in English folklore and subsequently featured in literature and film. According to legend, he was a highly skilled archer and swordsman.

## THE OBJECTIVE

---

With this words combination we look a simple line "Freedom" in Exohood we look for rightness and transparency, DeFi is not being entirely honest with rookie users, many projects that are launched in DEX end up buried. It is necessary to build a DEX with more transparency, easy to all users, safe, fully decentralized and powered by the Community Governance, that is why in Exohood we will take the definitive step to change and do things well and achieve a pro-quo. The Exohood Project allows users to earn rewards by providing liquidity using the EXO token. Exohood it will be one of many decentralized applications (dApps) that form the Binance ecosystem. Exohood will build a platform is a fully-decentralized and democratized AMM that puts the interests of the community first called (The Merry Outlaws).

# TOKEN

---

Exohood token (EXO) is a BEP-20 token standard, native to the Binance Smart Chain (BSC). EXO offers in the future great utility within the Exohood ecosystem, including representing governance rights in votes on updates or proposals to the protocol. Additionally, Exo tokens in the future we are used as liquidity rewards. The Exohood share of these supply is proportional to the amount of liquidity provided to the protocol a maximum cap of 120 EXO per block and a minimum supply of 1 EXO per block is in place.

The supply of Exohood Token (EXO) is elastic 1.000,000,000 EXO. But mint in the future is possible to change for the user governance for no more EXO supply. Moreover, the Exohood Team have a Frozen EXO in the long-term goals of the project and reassures users that the team won't dump their share of the tokens on users at the drop of a hat.

# WHY USE EXO?

---

Several reasons are causing people to turn away from Ethereum towards Binance Smart Chain (BSC). BSC is usually faster and cheaper to use than Ethereum. With gas prices reaching incredible heights, many simply can't afford to use Ethereum-based DeFi protocols. BSC has a fixed transaction fee which can be as low as 1 cent. Furthermore, block confirmation times are around three seconds per block. Also, when compared to Ethereum, BSC has a much lower barrier to entry.

The Binance ecosystem is thriving at the moment, with several successful projects all supported by one of the largest and most successful blockchain communities around. Complete with Ethereum Virtual Machine (EVM) compatibility, BSC makes it seamless for Solidity developers to go ahead and move to the new BSC platform.

# PRODUCTS

---

## EXO CARDS

- **Spend EXO Anywhere**

The ExoCard will let you shop at over 60 million merchants worldwide, both online and in-store. Earn up to 3% in EXO reward and use Apple Pay, Google Pay and Samsung Pay with your Virtual EXO Debit Card.

- **EXO Rewards**

Every time you spend with your ExoCard, you will receive up to 3% EXO rewards.

# PRODUCTS

---

## DECENTRALIZED EXCHANGE

- **ExoDEX**

Fully decentralized exchange and powered by the Community Governance.

- **How it works**

So, you'd like to own EXO token and get started on the Binance Smart Chain? Well it is easier than you might think. Just follow these 3 basic steps, and you'll be ready.

- **DeFi Wallet**

Download the TrustWallet or MetaMask extension on your browser. You can also download any other DeFi Wallet compatible with the Binance Smart Chain network with which you feel comfortable and safe.

- **Connecting DeFi Wallet**

While the TrustWallet is already integrated with Binance Smart Chain, you will need to do a little work to integrate your MetaMask account, if you are using that.

- **Trading**

Start trading EXO Token and others Token right away.

# PRODUCTS

---

## PRIVATE TRANSACTIONS

- **Exo Private**

Exo Private improves transaction privacy by breaking the on-chain link between source and destination addresses. It uses a smart contract that accepts BNB deposits that can be withdrawn by a different address. To preserve privacy a relayer can be used to withdraw to an address with no BNB balance. Whenever BNB is withdrawn by the new address, there is no way to link the withdrawal to the deposit, ensuring complete privacy.

- **Deposit**

A user generates a random key (note) and deposits BNB or a BEP20 token, along with submitting a hash of the note to the Exohood Private smart contract.

- **Wait**

After depositing, users should wait some amount of time before withdrawing to improve their privacy.

- **Withdraw**

A user submits a proof of having the valid key to one of the notes deposited and the contract transfers BNB or the BEP20 Token to a specific recipient.

# PRODUCTS

---

## SAFE BRIDGE

- **Crypto Bridge**

Bridge your Tokens between different Networks.

- **Tor Bridge**

Use Exo Tor bridge in case of the DeFi ecosystem is censored in countries with restrictions on financial freedom for all.

# PRODUCTS

---

## EXO PROBILLS

- **EXO Lightning Networking Services**

Exo Probills provides products and services that allow anyone to live on EXO more easily. Exo Probills provides a catalog of gift cards, prepaid mobile refills, and Lightning networking services that can be purchased using EXO token.

# PRODUCTS

---

## NFT MARKETPLACE

- **NFT Services**

Buy, Sell and create your own NFT

# COMMUNITY

---

## The Merry Outlaws Community

- **Governance**

EXO tokens represent voting shares in Exohood governance. You can vote on each proposal yourself.

# HOOD ALLIANCE

---

The Hood Alliance is a group of Binance Smart Chain (BSC) based DeFi projects coming together with the common mission of adding use cases and boosting the development of BSC DeFi ecosystem.

## **Objective of the Hood Alliance**

This Alliances strives to find synergies with other developers and teams in the Binance Smart Chain (BSC) ecosystem, with the ultimate goal to add new products and use cases, which will not only improve the utilization rate of current assets on BSC but also attract more users and assets to Binance Smart Chain.

## **How will Binance Smart Chain benefit from Hood Alliance?**

Exohood does not intend to compete with any of the successful BSC-based applications but aims to work closely with the Binance Smart Chain and project teams to reach our community benefits.

# HOOD ALLIANCE

---

All the projects in the Hood Alliance serve a certain goal to help the BSC ecosystem and utilization rate of BSC assets grow, which can be detailed as the following five points:

- Yield farming helps attract users with high yields from their assets, be it BSC or ETH based
- Stable coins liquidity will attract high value players who want low risk yields on their stable assets, again BSC or ETH based
- Lending, borrowing and OTC trading will bring more liquidity across all BSC based platforms.
- Initial token sales will attract new projects and their communities to trade on BSC
- NFT auctions will create a whole new ecosystem for ERC-721 tokens on BSC

# MERCHANDISE

---

- **Exo Shop**

Exohood exclusive and limited merchandise, you can buy and pay for it with EXO token.

# EXONOMICS

TOTAL SUPPLY: 1.000.000.000 EXO

## TOKEN ALLOCATION

**COMMUNITY:** 600.000.000 EXO

**TEAM:** 210.000.000 EXO

**INVESTORS:** 182.000.000 EXO

**ADVISORS:** 8.000.000 EXO

# TOKENOMICS

## Distribution

**Community:** 0x0594d6ac776f46837f2ecc16cd6b8f4a616eed4b

**Team:** 0x156dd746a820b7e4c6eab9e40ce3a4b2318c8201

**Investors:** 0x600a2ccc7c8779af245dec3cae9d430ffac27491

**Advisors:** 0x8778f4d4ea6ae699dc5f97ac318bdb3d9bbc20a4

EXO is the utility token of the Cripto Snack Project and has the following use cases:

- Governance: EXO token holders will vote on platform parameters to navigate the project's economics and developments.
- Incentives: EXO tokens are used to incentivize user participation in bounty hunting, referrals and other programs in the future.
- NFT Suite: EXO tokens are required for NFT minting, staking, auction, trading and more.
- System Tax: Users who transact with EXO tokens will contribute to a dividend pool.

## Token Specification

- Name: Exohood
- Symbol: EXO
- Network: Binance Smart Chain (BSC)
- Spec: BEP-20
- Precision: 18
- Smart Contract Address
- BSC: 0x7d10b6157c7c577caa62d319dc215209cf2db8c3

## Burning Token Address:

0x00000000000000000000000000000000dead

# ROAD MAP

---

## 1. First Stage

- Academic Research
- Project Proposal
- BSC Token Protocol Proposal
- Building Project
- BSC Token Building
- Internal Testing
- BSC Node
- BSC Protocol Exchange
- Testnet BSC System

# ROAD MAP

---

## 2. Second Stage

### **Exohood Token Officially Launch**

- Smart Contract Verified
- EXO Assets Transfer
- Website Launch (V1.0)
- Supply Smart Contract JulSwap
- Supply Smart Contract PancakeSwap

# ROAD MAP

---

## 3. Third Stage

### **EXO DEX BUILDING**

- Support Multiple Tokens
- Support More Projects
- Optimize Categories
- Support Multiple Public Chains

### **EXOCHAIN R&D Launch**

- BEP 908 Protocol Closed Testing
- Dividend System (Reward Pool)Closed Testing
- Dwitch (Exohood DEX) Closed Testing
- NFT Casting V2

# ROAD MAP

---

## 4. Fourth Stage

### EXO DEX BUILDING

- NFT Lending
- EXO CHAIN Testnet Testing (Phase 1-2)
- NFT Crosschain Development
- EXO Universe Crosschain Development
- Deploy BSC 908 Protocol in Binance Coin
- Dwitch Beta Testing
- Dividend System Launch

# ROAD MAP

---

## 5. Fifth Stage

### EXO UNIVERSE BUILDING

- EXOCHAIN Testnet Testing (Phase 3)
- EXOCHAIN Node Testing

### Deploy and Test in EXOCHAIN:

- NFT Casting
- Exo Universe
- Dwitch (swap)
- Dividend System
- NFT Crosschain Protocol

## 6. Final Stage

- EXOCHAIN Mainnet Officially Launch
- Exo Protocol Deployment & Application
