Exohood Whitepaper 2022

Version 2.0

Hello World

Exohood is an noncustodial automated protocol which generates value for the decentralized finance ecosystem through services and solutions that help accelerate the massive adoption of cryptocurrencies. Exohood is fed through a self-management system thanks to the collaboration of our developer team on Github.

Our team continues to build and work for you. Please remember, before investing in crypto, research and decide for yourself.

What does Exohood mean?

Exo: Ancient Greek words, 'Exo', meaning external, and 'planetes', meaning wanderer.

Hood: Refers to "Robin Hood," a legendary heroic outlaw originally depicted in English folklore and subsequently featured in literature and film. According to the legend, he was a highly skilled archer and swordsman.

Exohood is a Company?

NO, Exohood is an organization represented by rules encoded as a transparent computer program, controlled by the organization members, and not influenced by a central government. A DAO's financial transaction record and program rules are maintained on a blockchain.

Exohood is centralized?

NO, Exohood is Defi, or Decentralized Finance, is at its root a set of Smart Contracts running independently on blockchains such as Ethereum, Binance Smart Chain, or Tron network.

Will this project be open source?

Everything about Exohood is an open source in Github.

Is Exohood Audit?

Exohood is audited by Intercer and LL-C.

Exohood Team

We are a team spread worldwide, and decentralization is our goal. We are grateful to all of our community so far. To help Exohood maintain and build better products, we have decided to accept donations, and here is the address for incoming donations. We will use each donation to keep the ecosystem running, servers, marketing, advisors, and third-party services.

BTC: 12UjiyqDs5g4ab6oFTa3tmxjnm7UkQAK2m

ETH: 0x23C4eA440FE0C1f9e10FB16550456C8c625D5845

Products

Exchange

Buy and Sell over 160 Cryptocurrency and pay with Visa, MasterCard, or Bank Transfer or with more than 50 other currencies.

NFT Market

Buy, sell, and showcase NFTs. One-stop destination for ultra-rare collectibles and NFT art. User-friendly interface.

DeFi Trading

The best-in-class trading views across exchanges on a variety of chains. Now you can easily 'swap' your way to the moon.

Token Launchpad

Create your smart contract without coding, the safest and fastest way to create a token on Ethereum, Binance Smart Chain, Polygon and Tron.

EXO token

Exohood Allows users to earn rewards by providing liquidity using the EXO token. EXO tokens represent voting shares in Exohood governance.

Governance

The Exohood token enables community ownership and active stewardship of the Protocol. EXO holders govern the Protocol through an on-chain governance process.

Forum

A forum for governance-related discussion. Share proposals, provide feedback, and shape the future of the Exohood protocol.

Discord Server

Discuss your ideas with the governance and developers of the Exohood protocol.

Governance Portal

The official governance voting portal. Review live governance proposals and cast your vote.
